School of Information Technology

Graduate Professional Practice

Student Evaluation of Internship Experience

This form is confidential and will only be used by the School of Information Technology (IT). It is important for the Internship Coordinator to collect factual and evaluative data on individual job placements.

The factual data is used to measure the relevance of current course offerings within the curriculum. Feedback is encouraged as an ongoing attempt to maintain the expected quality of the IT curriculum.

The evaluative data is important so that the school can determine if this particular job placement is one that will continue to provide IT students with a challenging, high quality work/educational experience.

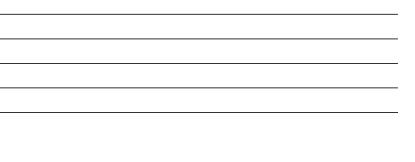

Whether or not you receive credit for your internship will be partially based upon the degree of thought, completeness, and sincerity perceived in your answers. Take your time. Honesty and accuracy is of utmost importance.
